Denis Gruszkiewicz

Integration Consultant Intern | APIs, SQL, issue investigation, documentation

Wrocław, Poland | +48 511 592 887 | r3dflzp.ns@gmail.com | github.com/Flyingzaptop | antillia.tech | linkedin.com/in/denis-gruszkiewicz-70739b411

PROFILE

Active student of Robotics and Process Automation (PWr) and IT systems (WSB Merito), and a Junior IT Administrator in a hospital for over a year. At work I reproduce user-reported issues, narrow down what is actually broken and write findings so someone else can act on them. In my own projects I build REST APIs and integrations (Django REST Framework, Node.js, TypeScript), query PostgreSQL with SQL and work in Git every day. Polish and English at C1 level.

SELECTED PROJECTS

LabFlow | REST API and workflow application

github.com/Flyingzaptop/LabFlow

Django REST Framework, OpenAPI, TypeScript, React, PostgreSQL, Vitest

- REST API with OpenAPI description, versioned procedures, sessions, role-based permissions and audit log.
- Technical documentation for Windows and Ubuntu deployment, backup and restore; backend tests and Vitest frontend tests.

JobHunter | data collection and integration workflows

github.com/Flyingzaptop/jobhunter-n8n

Node.js, TypeScript, n8n, PostgreSQL, Playwright, JSON schemas (AJV)

- Workflows that pull data from external sources, validate JSON against schemas and store state in PostgreSQL; failed or inconsistent records go to a human review step.
- SQL migrations, CI with GitHub Actions; status partial, with no unattended actions.

stargaze-l2-vwap | market data collectors

github.com/Flyingzaptop/stargaze-l2-vwap

Python, asyncio, aiohttp, WebSocket, Parquet, pytest

- Collectors that connect to several exchange APIs over WebSocket, handle event ordering and reconnects, and write checksummed Parquet frames with recovery after a crash.

EXPERIENCE

Junior IT Administrator | ZOZ w Bolesławcu

06.2025 – present

- Investigate reported problems in applications and systems: reproduce them, narrow down the cause and describe findings clearly for the team.
- Test application scenarios and fixes before changes go live; day-to-day support for hospital staff in Windows and Microsoft 365.
- Part of the team that built an employee-management and scheduling system (shifts, duty swaps, leave); built and handed over.

SKILLS

Integrations	REST and HTTP (methods, status codes, JSON), OpenAPI, JSON schema validation, WebSocket clients
Data	SQL (SELECT, WHERE, JOIN, reading schemas), PostgreSQL, SQLite
Development	TypeScript, JavaScript, Node.js, Python (up to OOP), Git (commits, branches, pull requests), GitHub Actions

EDUCATION

Wrocław University of Science and Technology

10.2022 – present

Higher education, engineering studies in progress: Robotics and Process Automation. Five of seven semesters completed. Active student status.

WSB Merito University, Wrocław

03.2026 – present

Higher education, engineering studies in progress (part-time): network, systems and IT security. Second semester.

LANGUAGES AND AVAILABILITY

Languages	Polish C1, English C1; Ukrainian and Russian native. Category B driving licence (3 years).
Availability	Start with 1 week notice. Part-time of about 6 hours a day works. Remote, or hybrid in Wrocław.
