PROFILE

Robotics and Process Automation student at Politechnika Wrocławska (five semesters completed) with practical Python projects in AI and automation: LLM workflows with local models, API and database integrations, automated tests and GitHub Actions CI. Over a year as a junior IT administrator in a hospital, investigating defects and testing applications. Looking for an entry-level AI engineering role under the guidance of experienced engineers.

RELEVANT SKILLS

- Python: scripts, API integrations and AI workflows up to object-oriented level; debugging, unit and integration tests, Git/GitHub.
- LLM applications: local LLM services (Ollama), prompt and schema-constrained analysis, streaming LLM integration; evaluating output quality. RAG so far only studied, not built.
- Data and APIs: REST APIs, JSON, OpenAPI (Django REST Framework), PostgreSQL/SQLite, data preparation with Polars/PyArrow/Parquet.
- CI and tooling: GitHub Actions, Docker Compose configuration, Linux basics (Ubuntu setup, SSH), documenting setup steps and test results.
- Defect investigation: reproducing reported errors and verifying fixes in hospital applications; Microsoft 365 and Windows user support.

PROFESSIONAL EXPERIENCE

Junior IT Administrator | ZOZ w Bolesławcu | 06.2025 - present

- Provide day-to-day technical support to hospital staff and diagnose hardware, operating system and application issues.
- Configure workstations and network devices, connect switches and LAN cabling, and investigate connectivity problems.
- Analyse user needs, reproduce reported errors and test application scenarios and fixes.
- Develop internal tools for repetitive tasks; worked on separate employee-management, scheduling and laboratory-process applications.

SELECTED PROJECTS

JobHunter - workflow automation and LLM application

Personal automation platform combining n8n, PostgreSQL, Playwright, local LLM services (Ollama, schema-constrained analysis), a Telegram human-in-the-loop step and a React dashboard. Automated tests (Node tests, pytest) run in GitHub Actions CI; Docker Compose configuration for local services.

LabFlow - Django/React workflow application

LabFlow (public demo, synthetic data): Python/Django 5.2 + Django REST Framework backend with OpenAPI, React/TypeScript frontend, SQLite/PostgreSQL, session authentication with CSRF, role-based permissions and audit history; backend and Vitest tests; Windows/Ubuntu deployment and recovery documentation.

EDUCATION

WSB Merito we Wrocławiu | 03.2026 - present

Network, systems and IT security engineering; part-time engineering studies, second semester.

Politechnika Wrocławska | 10.2022 - present

Robotics and Process Automation; engineering studies in progress, five semesters completed.

LANGUAGES AND AVAILABILITY

Polish - advanced; English - advanced / technical; Ukrainian and Russian - native. IT Step Python AI course, 02.2024 - 12.2024. Category B driving licence.

Seeking flexible working hours. From March 2027: available onsite in Wrocław up to 1–2 days per week, with remaining work remote. Open to part-time arrangements; start date by agreement.
