Denis Gruszkiewicz

Junior Software AI Engineer | AI agents, LLM-based automations, Python

Wrocław | +48 511 592 887 | r3dflzp.ns@gmail.com

github.com/Flyingzaptop | antillia.tech

PROFILE

Robotics and Process Automation student at Politechnika Wrocławska (five semesters completed) who builds AI-driven systems on my own: agentic and LLM workflows with n8n, PostgreSQL, Playwright and local LLMs, a Django/React application, and a two-year PyTorch machine-learning project. Experienced with Git, automated tests and CI, and used to reproducing and diagnosing issues from over a year as a junior IT administrator in a hospital. No commercial AI experience yet; strong motivation and a portfolio of self-built projects.

RELEVANT SKILLS

- AI agents and LLM workflows: JobHunter - multi-step workflows with local LLMs (Ollama), schema-constrained analysis, browser automation (Playwright) and a human-in-the-loop Telegram step; LabFlow - streaming LLM and speech-to-text integration.
- Python: custom tools, integrations and automations up to object-oriented level; debugging, Git/GitHub, PostgreSQL/SQLite, basic SQL; IT Step Python AI course (2024).
- Testing and evaluation: automated tests (pytest, Node tests, Vitest, CTest) in GitHub Actions CI; evaluating model outputs against baselines and checking for data leakage in my ML project.
- Machine learning: two-year independent PyTorch project (data collection, feature and target design, reinforcement-learning reward design, loss analysis); scikit-learn and Hugging Face Transformers in study notebooks.
- Working style: AI-assisted development (Cursor, Claude Code, Codex) under my own architecture; clear documentation; Microsoft 365 and Linux basics.

PROFESSIONAL EXPERIENCE

Junior IT Administrator | ZOZ w Bolesławcu | 06.2025 - present

- Provide day-to-day technical support to hospital staff and diagnose hardware, operating system and application issues.
- Configure workstations and network devices, connect switches and LAN cabling, and investigate connectivity problems.
- Analyse user needs, reproduce reported errors and test application scenarios and fixes.
- Develop internal tools for repetitive tasks; worked on separate employee-management, scheduling and laboratory-process applications.

SELECTED PROJECTS

JobHunter - workflow automation and LLM application

Personal automation platform combining n8n, PostgreSQL, Playwright, local LLM services (Ollama, schema-constrained analysis), a Telegram human-in-the-loop step and a React dashboard. Automated tests (Node tests, pytest) run in GitHub Actions CI; Docker Compose configuration for local services.

ML research - gold price modelling | Python / PyTorch

Two-year independent project: data collection, feature and target design, model training, reinforcement-learning reward design and loss analysis; models compared against baselines with chronological validity and data-leakage checks (github.com/Flyingzaptop/xauusd).

LabFlow - Django/React workflow application

LabFlow (public demo, synthetic data): Python/Django 5.2 + Django REST Framework backend with OpenAPI, React/TypeScript frontend, SQLite/PostgreSQL, session authentication with CSRF, role-based permissions and audit history; backend and Vitest tests; Windows/Ubuntu deployment and recovery documentation.

EDUCATION

WSB Merito we Wrocławiu | 03.2026 - present

Network, systems and IT security engineering; part-time engineering studies, second semester.

Politechnika Wrocławska | 10.2022 - present

Robotics and Process Automation; engineering studies in progress, five semesters completed.

LANGUAGES AND AVAILABILITY

Polish - advanced; English - advanced / technical; Ukrainian and Russian - native. IT Step Python AI course, 02.2024 - 12.2024. Category B driving licence.

Seeking flexible working hours. From March 2027: available onsite in Wrocław up to 1–2 days per week, with remaining work remote. Open to part-time arrangements; start date by agreement.
