## Junior AI & Automation Developer | Python, LLM-based solutions, integrations, testing

Wrocław | +48 511 592 887 | r3dflzp.ns@gmail.com

github.com/Flyingzaptop | antillia.tech

### PROFILE

Robotics and Process Automation student at Politechnika Wrocławska (five semesters completed) building AI and automation solutions in Python, n8n and Django/React: local LLM workflows, API integrations, automated tests and CI in GitHub Actions. Over a year as a junior IT administrator in a hospital, supporting users and testing internal applications. Looking for an early-career role combining development, testing and operational support.

### RELEVANT SKILLS

- Python and automation: scripts, data pipelines and workflow automation up to object-oriented level; debugging, Git/GitHub.
- LLM and AI applications: local LLM services (Ollama) with schema-constrained analysis, streaming LLM and speech-to-text integration in LabFlow, OpenAI-based Telegram bot; Hugging Face Transformers in study notebooks.
- Integrations and APIs: REST APIs and OpenAPI (Django REST Framework), n8n workflows connecting PostgreSQL, Playwright and external services; React/TypeScript frontend.
- Testing and CI: pytest, Node tests, Vitest, CTest in GitHub Actions; evaluating outputs of LLM-based analysis in JobHunter.
- Operational support: user support, reproducing and diagnosing reported issues, Linux basics, Microsoft 365.

### PROFESSIONAL EXPERIENCE

**Junior IT Administrator | ZOZ w Bolesławcu | 06.2025 - present**

- Provide day-to-day technical support to hospital staff and diagnose hardware, operating system and application issues.
- Configure workstations and network devices, connect switches and LAN cabling, and investigate connectivity problems.
- Analyse user needs, reproduce reported errors and test application scenarios and fixes.
- Develop internal tools for repetitive tasks; worked on separate employee-management, scheduling and laboratory-process applications.

### SELECTED PROJECTS

**JobHunter - workflow automation and LLM application**

Personal automation platform combining n8n, PostgreSQL, Playwright, local LLM services (Ollama, schema-constrained analysis), a Telegram human-in-the-loop step and a React dashboard. Automated tests (Node tests, pytest) run in GitHub Actions CI; Docker Compose configuration for local services.

**LabFlow - Django/React workflow application**

LabFlow (public demo, synthetic data): Python/Django 5.2 + Django REST Framework backend with OpenAPI, React/TypeScript frontend, SQLite/PostgreSQL, session authentication with CSRF, role-based permissions and audit history; backend and Vitest tests; Windows/Ubuntu deployment and recovery documentation.

### EDUCATION

**WSB Merito we Wrocławiu | 03.2026 - present**

Network, systems and IT security engineering; part-time engineering studies, second semester.

**Politechnika Wrocławska | 10.2022 - present**

Robotics and Process Automation; engineering studies in progress, five semesters completed.

### LANGUAGES AND AVAILABILITY

Polish - advanced; English - advanced / technical; Ukrainian and Russian - native. IT Step Python AI course, 02.2024 - 12.2024. Category B driving licence.

Seeking flexible working hours. From March 2027: available onsite in Wrocław up to 1–2 days per week, with remaining work remote. Open to part-time arrangements; start date by agreement.
